

# State Tax Subsidies for Private K-12 Education

Institute on Taxation & Economic Policy

*October 2016 (with updates from May 2017)*

Carl Davis

## **About The Institute on Taxation & Economic Policy**

The Institute on Taxation and Economic Policy (ITEP) is a non-profit, non-partisan research organization that works on federal, state, and local tax policy issues. ITEP's mission is to ensure that elected officials, the media, and the general public have access to accurate, timely, and straightforward information that allows them to understand the effects of current and proposed tax policies. ITEP's work focuses particularly on issues of tax fairness and sustainability.

# INTRODUCTION

One of the most important functions of government is to maintain a high-quality public education system. In many states, however, this objective is being undermined by tax credits and deductions that redirect public dollars for K-12 education toward private schools. Twenty states currently divert a total of over \$1 billion per year toward private schools via special tax credits and deductions.<sup>1</sup> These tax subsidies are essentially backdoor voucher programs, or “neovouchers,” as they use the tax code to provide what amount to private school vouchers even when traditional voucher programs are unpopular with the public or outright unconstitutional.<sup>2</sup>

Because of the ways that state and federal tax law interact, the subsidies offered in nine of these states turn the concept of a charitable “donation” on its head by offering upper-income taxpayers a risk-free profit on contributions they make to fund private school scholarships. In these cases, even taxpayers who would not ordinarily be interested in contributing to private schools may find the incentive too strong to ignore. Some states have seen an entire year’s allotment of tax credits claimed within days, or even hours, of being made available as wealthy taxpayers seek to capture their share of the profits associated with convoluted “neovoucher” systems. In effect, states that have encountered political or constitutional obstacles to spending public dollars on private schools have instead set up a system that allows wealthy taxpayers to enjoy a profit by facilitating such spending on the state’s behalf.

This report explains the workings, and problems, with state-level tax subsidies for private K-12 education. It also discusses how the Internal Revenue Service (IRS) has exacerbated some of these problems by allowing taxpayers to claim federal charitable deductions even on private school contributions that were not truly charitable in nature. Finally, an appendix to this report provides additional detail on the specific K-12 private school tax subsidies made available by each state.

## TYPES OF TAX CREDITS AND DEDUCTIONS

State-level tax provisions designed to subsidize private schools typically fall into one of two categories: those designed to facilitate the granting of private school scholarships, and those designed to offset private school expenses for families with children enrolled in such schools.

---

<sup>1</sup> ITEP calculation using data compiled in the appendix of this report.

<sup>2</sup> A 2013 poll found that 70 percent of the public opposes “allowing students and parents to choose a private school to attend at public expense.” Bushaw, William J. and Shane J. Lopez. “Which way do we go? The 45<sup>th</sup> annual PDK/Gallup Poll of the Public’s Attitudes Toward Public Schools.” September 2013. Available at: [https://www.au.org/files/pdf\\_documents/2013\\_PDKGallup.pdf](https://www.au.org/files/pdf_documents/2013_PDKGallup.pdf). Arizona may be the most prominent example of a state adopting a neovoucher program as a way to circumvent a constitutional prohibition on public funding of traditional vouchers. “Private School Tax Credits Divert Public Dollars for Private Benefits. Children’s Action Alliance. January 2016. Available at: <http://azchildren.org/wp-content/uploads/2016/02/Private-School-Tax-Credit-brief-12-151.pdf>. For additional discussion of the similarities between vouchers and neovouchers, see: Welner, Kevin. “Neovouchers’: A Primer on Private School Tax Credits.” *The Washington Post*. March 3, 2013. Available at: <https://www.washingtonpost.com/news/answer-sheet/wp/2013/03/03/neovouchers-a-primer-on-private-school-tax-credits/>.

### Tax subsidies for private school scholarships

The most common, and most costly, tax subsidies for private education are intended to encourage businesses and/or individuals to contribute to organizations that distribute private school scholarships to qualifying students. Seventeen states offer tax credits designed to accomplish this purpose (see Figure 1), and their design varies considerably by state:

- Sixteen states offer nonrefundable scholarship credits, with some of these limited to a certain percentage of tax liability. In Georgia, for example, the scholarship credit cannot be used to offset more than 75 percent of income tax liability in a given year. Many of these credits can be “carried forward,” however, meaning that if a taxpayer does not owe enough tax to be able to use the credit this year, they can opt to claim some or all of the credit in later years. Louisiana is the only state where the scholarship credit is refundable—actually administered as a rebate—and therefore not tied to tax liability in any way.
- Scholarship tax credits range from 50 percent of the contribution amount (Indiana and Oklahoma) to 100 percent of the total contribution (Alabama, Arizona, Florida, Georgia, Montana, Nevada, and South Carolina). Credits equal to 100 percent of the contribution are designed to allow taxpayers to redirect their tax payments toward private institutions at no cost to themselves. In practice, the actual tax benefits for credit recipients can sometimes even exceed the size of the donation. When the impact of state tax credits is combined with federal tax deductions (and sometimes state tax deductions as well), some taxpayers can actually turn a profit by making these so-called “donations”—an outcome described in detail below.

**Figure 1: State Tax Credits and Deductions for Private K-12 Education**

State	Private School Scholarship	Private School Tuition and/or Expenses
<b>Total Number of States</b>	<b>17</b>	<b>8</b>

- Of the seventeen states that offer a scholarship credit, seven states only extend their credits and deductions to businesses (Florida, Kansas, Nevada, New Hampshire, Pennsylvania, Rhode Island, and South Dakota). Notably, four of these states do not levy personal income taxes. Among the ten states that allow both businesses and individuals to claim scholarship credits, four states (Arizona, Georgia, Oklahoma, and Virginia) allow businesses to claim a larger credit than individual taxpayers.
- While the scholarships funded by many of these tax credits are limited to low- or middle-income families, states such as Arizona, Georgia, and Montana offer at least some of the scholarships with no income restrictions.
- Some states place further limits on scholarship eligibility beyond income level, such as Pennsylvania where students must live in a “low-achieving” school zone and Kansas where students over six years of age must have been enrolled in a public school during the previous school year. These requirements have not always been strictly enforced, however, such as when the Georgia Department of Education signed off on parents “enrolling” their children in public schools to gain eligibility for the scholarship program, despite having no intention of allowing their children to attend the public schools in which they enrolled.<sup>3</sup>
- Aggregate limits on the size of these credits vary widely. Oklahoma’s credit is capped at just \$3.4 million, for example, while Florida’s cap is set at almost \$700 million for Fiscal Year 2018.<sup>4</sup>

### ***Tax subsidies for private school tuition and/or expenses***

Eight states offer tax credits or deductions to individuals to defray the cost of attending a private school (see Figure 1). The design of these tax subsidies varies considerably across states:

- Four states structure their subsidies as deductions, while five states offer tax credits (Minnesota offers both). Tax credit design also varies by state, with Illinois and Iowa allowing only “nonrefundable” credits that can offset, but not exceed, the taxpayer’s income tax bill. Alabama, Minnesota, and South Carolina offer “refundable” credits that are not dependent on earning enough to owe income tax.
- The private school expenses that qualify for the tax subsidy vary by state. Wisconsin’s deduction is limited to private school tuition, for example, while Indiana applies its deduction much more broadly to include not just tuition but also textbooks, fees, software, tutoring, and school supplies. Minnesota offers a deduction for both tuition and expenses, as well as a refundable credit that can only be applied against non-tuition expenses.
- Most state tax subsidies for private school expenses are available to all families regardless of income level or other characteristics. In South Carolina, however, the credit is only available to families with exceptional needs children. In Alabama the benefit is only available for children enrolled in a public school judged to be “failing.” And in Minnesota, the credit portion of the subsidy begins phasing out for families with incomes above \$33,500.

---

<sup>3</sup> Saul, Stephanie. “Public Money Finds Back Door to Private Schools.” *The New York Times*. May 21, 2012. Available at: <http://www.nytimes.com/2012/05/22/education/scholarship-funds-meant-for-needy-benefit-private-schools.html>.

<sup>4</sup> “Florida Tax Credit Scholarships.” Florida Department of Education. Available at: <http://www.fldoe.org/schools/school-choice/k-12-scholarship-programs/ftc/>. Accessed October 7, 2016.

- ◆ Each state uses a different formula for calculating the subsidy and imposes different limits on the size of the subsidy. Deductions range in size from \$1,000 per dependent in Indiana to \$10,000 per dependent (grades 9-12) in Wisconsin. Tax credits vary significantly as well, with more generous credits confined to states such as Alabama and South Carolina that, as mentioned above, only allow a small subset of students to claim them. The broader credits made available to all, or most, private school students vary from a maximum of \$250 per dependent in Illinois and Iowa to \$1,000 per dependent in Minnesota.

## **SUBSIDIES RUN AMOK: PROFITING FROM SCHOLARSHIP “DONATIONS”**

In 2011, the IRS issued a memo indicating that taxpayers can claim a federal charitable deduction for private school scholarship donations even when those donations are also subsidized with a state tax credit.<sup>5</sup> While the memo states that it “may not be used or cited as precedent,” scholarship organizations in over dozen states have been advising their donors that their contributions are eligible for a federal tax deduction in addition to a state tax credit.<sup>6</sup> For some high-income taxpayers, this dual benefit can turn a scholarship “donation” into a profit-generating scheme where the total tax cut received significantly exceeds the size of the original donation. It should therefore come as little surprise that in some states, the entire allotment of available credits is often claimed just hours after state tax officials begin accepting applications.

A close look at South Carolina’s scholarship tax credit illustrates how this works. In the Palmetto State, taxpayers receive a dollar-for-dollar tax credit for any “donations” they make to certain nonprofit scholarship funding organizations—thereby making the donation essentially costless to the taxpayer. Assuming the taxpayer itemizes on their federal return, the immediate federal tax consequence of a donation is twofold: the taxpayer’s charitable deductions increase by the amount of the donation, and the taxpayer’s state income tax deduction falls by the amount of the tax credit they received. At first, this may appear to result in a wash for the taxpayer. But this is not always the case because in some instances, charitable deductions are more valuable than deductions for state income taxes paid.

At the federal level, one of these instances arises when taxpayers are subject to the individual Alternative Minimum Tax (AMT).<sup>7</sup> The AMT is designed to ensure that taxpayers receiving generous tax breaks pay at least some minimum level of federal income tax. This is accomplished by denying certain tax breaks under AMT rules, including the deduction for state and local tax payments. Charitable donations, however, are still tax deductible under the AMT. So the ability to reclassify state income tax payments as charitable donations via a scholarship tax credit can be of significant benefit to taxpayers subject to the federal AMT—a group overwhelmingly comprised of taxpayers earning over \$200,000 per year.<sup>8</sup>

<sup>6</sup> An ITEP review found scholarship organizations advising donors that they can claim the federal charitable deduction in addition to state tax credits in Alabama, Arizona, Georgia, Indiana, Iowa, Louisiana, Montana, New Hampshire, Oklahoma, Pennsylvania, Rhode Island, South Carolina, and Virginia.

<sup>7</sup> The corporate AMT faced by C corporations does not allow for the same type of gaming described in this report.

<sup>8</sup> IRS Statistics of Income data for Tax Year 2014 indicate that 82 percent of returns owing AMT, and 93 percent of dollar raised via the AMT, are associated with this group. Taxpayers earning between \$200,000 and \$500,000 per year are most likely to be affected by the AMT, with 61 percent of

## Figure 2: Potential Profits from "Donations" to Scholarship Organizations

State	Credit Parameters			Taxpayer Facing 35% Marginal Federal AMT Rate (inside AMT phase-out)		Taxpayer Facing 28% Marginal Federal AMT Rate	
	Type of Taxpayer (Individual or Business) <sup>a</sup>	Maximum Donation Eligible for Credit	Credit Percentage	Potential Profit on Maximum Donation	% Profit on Maximum Donation	Potential Profit on Maximum Donation	% Profit on Maximum Donation
Alabama	Both	\$50,000	100%	\$16,625	33%	\$13,300	27%
Arizona	Individual	\$2,173	100%	\$662	30%	\$510	23%
Arizona	Business	Unlimited <sup>b</sup>	100%	Unlimited <sup>b, c</sup>	30%	Unlimited <sup>b</sup>	23%
Georgia	Individual	\$2,500	100%	\$725	29%	\$550	22%
Georgia	Business	\$10,000	100%	\$2,900	29%	\$2,200	22%
Montana	Both	\$300	100%	\$105	35%	\$84	28%
Oklahoma	Individual	\$2,667	75% <sup>d</sup>	\$400	15%	\$213	8%
Oklahoma	Business	\$133,333	75% <sup>d</sup>	\$20,000	15%	\$10,667	8%
Pennsylvania	Business	\$2,221,111 <sup>e</sup>	75 / 90 / 100% <sup>g</sup>	\$256,278 <sup>c</sup>	12%	\$100,800	5%
Pennsylvania	Business	\$1,887,778 <sup>f</sup>	90 / 100% <sup>g</sup>	\$472,944 <sup>c</sup>	25%	\$340,800	18%
Rhode Island	Business	\$133,333	75%	\$13,333	10%	\$4,000	3%
Rhode Island	Business	\$111,111	90% <sup>h</sup>	\$27,778	25%	\$20,000	18%
South Carolina <sup>i</sup>	Both	Unlimited <sup>b</sup>	100%	Unlimited <sup>b, c</sup>	35%	Unlimited <sup>b</sup>	28%
Virginia <sup>i</sup>	Individual	\$125,000	65%	\$7,188	6%	No profit	No profit
Virginia <sup>i</sup>	Business	Unlimited <sup>b</sup>	65%	Unlimited <sup>b, c</sup>	6%	No profit	No profit

<sup>a</sup> "Business" refers only to businesses subject to the individual income tax.

<sup>b</sup> Arizona and Virginia do not impose caps on business taxpayers' maximum eligible donation, and South Carolina does not impose caps on any taxpayer. But total annual tax credit distributions in these states are limited to \$67 million in Arizona for the business portion of the credit, \$10 million in South Carolina, and \$25 million in Virginia.

<sup>c</sup> In practice, potential benefits under the 35 percent marginal AMT rate are limited by the fact that only taxpayers with Alternative Minimum Taxable Income below \$494,900 (in 2016) face this rate.

<sup>d</sup> Oklahoma's 75 percent credit is only available to taxpayers who pledge to contribute for two consecutive years. The state's 50 percent credit for single year contributions cannot be used to generate a profit.

<sup>e</sup> Assuming contributions of \$1,000,000 each under both the OSTC and EITC, plus \$221,111 under the Pre-K portion of the EITC.

<sup>f</sup> Assuming contributions of \$833,333 each under both the OSTC and EITC, plus \$221,111 under the Pre-K portion of the EITC.

<sup>g</sup> Most of Pennsylvania's credits are limited to 75 percent for single year donations and 90 percent for taxpayers who pledge to contribute for two consecutive years. The first \$10,000 in contributions for Pre-K scholarships receive a 100 percent credit and the next \$211,111 of contributions receive a 90 percent credit.

<sup>h</sup> Rhode Island's 90 percent credit is only available to taxpayers who pledge to contribute for two consecutive years.

<sup>i</sup> Because South Carolina and Virginia allow taxpayers to claim scholarship tax credits based on the market value of marketable securities, even larger profit margins are available to taxpayers that avoid federal and state capital gains taxes by donating appreciated stock. The potential profit margin depends on the degree to which the stock has appreciated.

**Source:** Institute on Taxation and Economic Policy (ITEP)

this group owing some amount under the levy. By comparison, 45 percent of taxpayers earning between \$500,000 and \$1 million owe some amount of AMT, as well as 19 percent of taxpayers earning over \$1 million.

The amount of benefit that can be realized by this reclassification depends on the amount of AMT owed and the taxpayer's marginal tax rate under the AMT. Since marginal tax rates under the AMT range as high as 35 percent (after taking into account the AMT exemption phase-out), every dollar donated can potentially result in a federal tax cut of up to 35 cents. When combined with a dollar-for-dollar state tax credit, this means that a private school "donation" in South Carolina is better than costless, and can actually result in a risk-free return as high as 35 percent of every dollar "donated."

As shown in Figure 2, South Carolina's 35 percent maximum return on scholarship contributions is one of the most lucrative in the nation. Of the nine states where taxpayers can turn a profit by claiming federal and state tax benefits on the same contribution, only Montana matches South Carolina in offering potential profit margins of this size. However, Montana places a limit on the maximum donation that can be subsidized via a credit—the state's \$300 cap means that no taxpayer will receive more than \$105 in profit in a given year.<sup>9</sup> The next highest profit margin (33 percent) is available in Alabama, where a much higher cap on eligible donations (\$50,000) allows for profits as large as \$16,625 per year. But South Carolina's limits on tax credit claims are significantly looser than in either of these two states. The maximum size of any taxpayer's credit in South Carolina is not subject to a firm cap, though taxpayers cannot receive credits in excess of 60 percent of their tax liability and the state will not distribute more than \$10 million in total credits in a given year.

In the other six states where these tax credits can be paired with deductions to turn a profit, various tax rules (e.g., lower credit percentages, interactions with state itemized deduction rules, or the offsetting effects of state deductions for federal taxes paid) reduce the percentage yields to 30 percent or less.<sup>10</sup> Nonetheless, scholarship contributors with sufficient resources and enough knowledge of the federal AMT can still earn tens of thousands of dollars, or more, risk free in a single year. While a tax savvy business owner in Pennsylvania, for example, faces a lower profit margin (up to 25 percent) than in Alabama (up to 33 percent), Pennsylvania's much higher cap on eligible donations allows for much larger potential profits. Under the right set of circumstances, a Pennsylvania business owner could reap hundreds of thousands of dollars in profit in a single year. Other states with particularly lucrative scholarship tax benefits include Arizona and Virginia, where business owners are eligible to receive tax credits without limit.<sup>11</sup>

Many scholarship organizations have realized that the profit-generating opportunities outlined above may appeal to donors that would not otherwise be interested in giving to private schools. One organization based in Georgia, for example, brags to potential donors that "you will end with more money than when you started"<sup>12</sup> Similarly, a tax lawyer in Alabama notes on her firm's website that for taxpayers subject to the AMT, "donating" will actually "put money in your pocket."<sup>13</sup> Private schools in Oklahoma and Pennsylvania have attempted to demonstrate the potential monetary gains of "donating" with hypothetical examples showing the financial returns of participating in their states' programs.<sup>14</sup> And while they may not hold

---

<sup>9</sup> The cap is \$150 for individuals and \$300 for married couples filing jointly.

<sup>10</sup> Scholarship credits in another seven states cannot be used to turn a profit because the credit percentage is too small (Indiana), the credit cannot be paired with a state charitable deduction (Iowa), or because the credit is not available to taxpayers subject to the personal income tax and thus the federal individual AMT does not apply (Florida, Kansas, Nevada, New Hampshire, and South Dakota).

<sup>11</sup> Arizona and Virginia do cap the overall amount of tax credits available statewide each year, however.

the program in high regard, a wealth management firm in Virginia notes that a taxpayer can enjoy a savings that is “more than their original donation” before going on to explain that “There is very little logic to the tax code. Even if you don’t agree with the law, you should take advantages of the tax benefits.”<sup>15</sup>

## Other Types of Tax Benefit Stacking

For taxpayers subject to the federal Alternative Minimum Tax (AMT), federal charitable deductions are typically the most lucrative tax benefit that can be stacked on top of state scholarship tax credits. But there are at least two other types of tax preferences that can be claimed alongside these credits in certain states.

First, while most states prohibit taxpayers from claiming a state-level charitable deduction for donations that were also eligible for a state tax credit, three states (Louisiana, Oklahoma, and Virginia) actually allow this type of double dipping.\* Since Oklahoma and Virginia do not allow taxpayers to deduct their state income tax payments from their state tax bills, converting non-deductible state tax payments into deductible charitable “donations” is a lucrative benefit. In Louisiana, where both state income tax payments and charitable donations are deductible, the benefit is smaller since only the portion of the donation that is not directly offset by a state tax credit triggers a tax benefit.

Second, South Carolina and Virginia allow taxpayers to receive scholarship credits not just on cash donations, but also on the market value of any stock that they donate. This feature opens the door to additional profit opportunities for investors in these states. When a taxpayer donates stock that has appreciated in value, they receive not just the state tax credit and state and federal charitable deductions already described, but also the ability to avoid paying any state or federal tax on the capital gains income generated by that stock. When donating stock that has grown significantly in value since it was purchased, the tax benefit of this “donation” can far exceed the actual value of the stock donated.\*\*

---

\* An ITEP review of those states where credits are available under the personal income tax found that donations subsidized via a state tax credit cannot also be taken as a state deduction for charitable contributions in Alabama, Arizona, Georgia, Iowa, Montana, and South Carolina. Indiana, Pennsylvania, and Rhode Island do not allow charitable deductions of any kind.

\*\* The potential profit opportunities depend on the degree to which the stock has appreciated in value. For example, one hypothetical scenario circulated by a Catholic school and associated foundation in Roanoke, Virginia depicts a taxpayer enjoying a risk-free return of 19.4 percent on their “donation.” Roanoke Catholic School and McMahon Parater Foundation for Education. “Frequently Asked Questions: Education Improvement Scholarships Tax Credits.” March 2014. Available at: <https://s3.amazonaws.com/roanokecatholicschool/roanokecatholicschool/wp-content/uploads/2014/03/EISTC-Donor-FAQ-3-14-Roanoke.pdf>.

Wealthy taxpayers appear to have taken notice. In Georgia, the state’s entire allotment of \$58 million in scholarship credits was claimed in a single day on January 1, 2016.<sup>16</sup> Later in the year, the same occurred within a matter of hours with regard to \$67 million of credits in Arizona and \$763,550 in credits in Rhode Island.<sup>17</sup> While taxpayer confidentiality laws generally conceal the magnitude of the benefits received by specific claimants, a journalist in South Carolina estimated that one savvy,

anonymous taxpayer was able to reap a profit of between \$100,000 and \$638,000 in 2014 by stacking state, and possibly federal, deductions on top of scholarship tax credits.<sup>18</sup>

## OTHER ISSUES WITH PRIVATE SCHOOL TAX SUBSIDIES

Tax subsidies, or neovouchers, for private education are problematic both as tax policies and as education policy initiatives. Aside from the profit-making schemes just described, other issues associated with these programs include:

- ♦ ***Dubious educational benefits for recipients.*** Neovouchers are often touted as a way to improve educational outcomes by making it possible for families in areas with underperforming public schools to send their children to private schools instead. But there is little evidence that voucher programs of any kind have improved educational outcomes, and some recent studies suggest that students switching from public to private schools in Indiana and Louisiana actually scored lower on reading and math tests after making the switch.<sup>19</sup> Moreover, it can be difficult for parents to determine the actual quality of private schools in their area when those schools are not subject to the same accountability mechanisms as public schools. In Pennsylvania, for instance, schools benefiting from the state's neovoucher program are exempt from state testing requirements and from reporting information on student progress or achievement.<sup>20</sup>
- ♦ ***Erosion of the public education system.*** While neovouchers are unlikely to improve educational outcomes for students moving to private schools, the negative impact on those students remaining in public schools is even clearer. Thirty neovouchers across twenty states are draining over \$1 billion in public revenues from state coffers every year. Every dollar of revenue diverted toward private schools is revenue that cannot be invested in the public education system. Allowing certain taxpayers to opt out of funding an institution as fundamentally important as the nation's public school system erodes the public's level of investment in that institution—both literally and figuratively.
- ♦ ***Exaggerated cost savings.*** Neovoucher proponents often claim that state and local governments can realize substantial savings by moving students out of the public school system and into private schools. But while reductions in public school enrollment may reduce certain costs in certain circumstances, many costs are relatively fixed (maintenance, utilities, administration, etc.) and cannot be easily cut when students leave.<sup>21</sup> Moreover, when neovouchers are provided to families whose children would have been enrolled in private school anyway, the result is a loss of revenue without any actual reduction in enrollment or school district expenses. Research on Arizona's tax credit program, for instance, found that most spending is directed toward students already enrolled in private schools.<sup>22</sup> And dramatic increases in funding

for Arizona’s neovoucher programs do not appear to be leading to an exodus of public school students—enrollment in private schools has stagnated while public school enrollment has increased significantly.<sup>23</sup>

- ♦ **Poorly targeted.** Though frequently justified as a lifeline for disadvantaged children, the beneficiaries of neovoucher programs are often not low-income students. States such as Oklahoma and Pennsylvania allow upper-middle income families to benefit from scholarship subsidies, while other states such as Arizona, Georgia, and Montana allow even high-income families to benefit. Subsidies for tuition and other private school expenses are also typically made available regardless of income level. Making matters worse are the specific design decisions behind many of these tax subsidies. Tax deductions and nonrefundable credits are of no help to low-income families that earn too little to owe income tax. For that reason, even neovoucher advocates have suggested converting programs such as Wisconsin’s tuition deduction into refundable credits (though it is important to note that such a conversion would likely result in a dramatic increase the program’s overall cost).<sup>24</sup>
- ♦ **Constitutional issues.** Advocates of state subsidies for private education, such as the American Legislative Exchange Council (ALEC), often encourage states to administer their voucher programs via the tax code in order to circumvent state constitutional prohibitions on the public funding of religious schools.<sup>25</sup> According to ALEC, while lawmakers in eighteen states are constitutionally forbidden from offering direct vouchers for religious schools, tax credit neovouchers can be used to accomplish a nearly identical result in all but two of those states.<sup>26</sup> In some cases, these schools have curricula (such as biblical versions of science and history) or personnel policies (such as firing teachers if they enter a same-sex marriage or become pregnant outside of wedlock) that would be prohibited at a public institution and that raise questions about the appropriateness of directing public dollars toward these schools.<sup>27</sup> Arizona is perhaps the most well-known example of a state that succeeded in labeling its subsidies as “tax reductions” rather than “direct spending” in order to circumvent its own constitution. In 1998, the Arizona Supreme Court ruled 3-2 in *Kotterman v. Killian* that, unlike a traditional voucher, the state’s tax credit scholarships were not in violation of the Arizona Constitution in part because the credits are technically diverted to private schools before reaching the state’s coffers. In 2011, the U.S. Supreme Court reached a similar conclusion in a 5-4 ruling in *Arizona Christian School Tuition Organization v. Winn*. But while neovouchers have so far been upheld on relatively narrow grounds, Supreme Court Justice Elena Kagan cut to the heart of the matter when she explained in her dissent that “cash grants and targeted tax breaks are means of accomplishing the same government objective—to provide financial support to select individuals or organizations.”

<sup>26</sup> *Ibid.* The sixteen states allowing neovouchers but not ordinary vouchers include Alaska, California, Delaware, Florida, Hawaii, Idaho, Kentucky, Missouri, New Hampshire, New Mexico, Oregon, South Dakota, Vermont, Virginia, Washington, and Wyoming. In Massachusetts and Michigan, both vouchers and neovouchers are unconstitutional. According to ALEC, Educational Savings Accounts are constitutional in Arizona though traditional vouchers are not.

- ♦ *Lack of budgetary oversight.* Subsidies for private education provided via neovouchers are often not subject to the same budgetary oversight as ordinary spending on public education. Most notably, once a neovoucher is enacted into law it typically continues indefinitely without reexamination as part of the appropriations process. Moreover, those neovouchers not subject to an aggregate budgetary cap can grow significantly in cost without any action on the part of lawmakers. And even those neovouchers that are subject to caps sometimes see the cap structured in a way that allows for growth that far outpaces other areas of the budget, such as one of Arizona’s neovouchers for corporate taxpayers which is currently growing at a rate of 20 percent per year.<sup>28</sup>

## CONCLUSION

Rather than enhancing educational opportunities, tax subsidies for private education often benefit students already enrolled in private schools while reducing the amount of state revenue available for public schools. Worse still, they undermine support for public education and give credence to the false notion that citizens who send their children to private schools have no obligation to support public schools.

On top of these problems, upper-income families that are able to exploit complex interactions between state and federal tax law can sometimes use these backdoor subsidies to generate a profit for themselves. This is made possible largely because the IRS currently allows taxpayers to claim a charitable deduction for private school contributions even when those contributions were fully reimbursed by the state and were therefore not truly charitable in nature. The resulting profits being collected by a small group of savvy taxpayers represent a drain on public revenue that ultimately benefits neither private nor public school students.

Neovouchers are an inefficient and opaque way of redirecting public dollars toward private schools. Nonetheless, these tax subsidies are being enacted in a growing number of states. It appears that their growing prevalence is partly attributable to their usefulness in sidestepping state constitutional restrictions, and partly because their lack of transparency helps avoid opposition from a public that generally opposes spending public funds on private schools.

**Note:** This report was updated in May 2017 to acknowledge that South Carolina taxpayers can profit by donating stock that has appreciated in value, and that Louisiana’s tuition donation rebate does not allow taxpayers to turn a profit because the rebate is considered to be taxable income in the year in which it is received.

---

<sup>28</sup> The credit described here is designed to grow from \$10 million in 2007 to \$107 million in 2020. “Private School Tax Credits Divert Public Dollars for Private Benefits. # APPENDIX: DETAILS ON STATE TAX SUBSIDIES FOR PRIVATE K-12 EDUCATION

State	Category	Name	Tax	Type	Description	Tax Break Amount	Enacted	Cost
Alabama	Private School Tuition and/or Expenses	Accountability Act of 2013 Parent-Taxpayer Refundable Tax Credits	Personal Income Tax	Refundable Credit	Parents receive a tax credit for K-12 education costs. If the taxes owed by the parents are less than the total credit allowed, they may receive a rebate equal to the balance of the unused credit. Only available to parents of students enrolled in or assigned to a failing public school (not available if students are already enrolled in private school).	Credits capped at the lesser of (1) 80 percent of the average annual state cost of attendance for a K-12 public school student during the applicable tax year or (2) their children's actual cost of attending school.	2013	Unknown
Alabama	Private School Scholarship	Credit for Contributing to Scholarship Granting Organization	Personal and Corporate Income Taxes	Nonrefundable Credit	Tax credits to donors supporting Scholarship Granting Organizations (SGOs), nonprofits that provide private school scholarships to students in need.	Individuals and corporations can claim a 100 percent tax credit for contributions to approved SGOs. Individuals and corporations can claim tax credits up to 50 percent of their tax liability; however, individual tax credits cannot exceed \$50,000 per taxpayer (the cap is the same for individuals and married couples filing jointly). Taxpayers may carry forward a tax credit under this program for three years. The total amount of tax credits awarded statewide is limited to \$30 million.	2013	\$21,566,768 in FY16 Credits capped at \$30 million per year (increased from \$25m in 2016)
Arizona	Private School Scholarship	Credit for Contributions to School Tuition Organizations	Personal Income Tax	Nonrefundable Credit	An individual may claim a credit for making a donation to a School Tuition Organization for scholarships to private schools.	2016 maximum credit of \$545 for single filers and \$1,090 for married filers; adjusted annually for inflation	January 1998	\$61.7 million in 2015
Arizona	Private School Scholarship	Additional Credit for Contributions to School Tuition Organizations (Private School Tuition "Switcher" Credit)	Personal Income Tax	Nonrefundable Credit	An individual may claim an additional credit for making a donation to a School Tuition Organization if the amount contributed is greater than the maximum amount that can be claimed on Form 323.	2016 maximum credit of \$542 for single filers and \$1,083 for married filers; adjusted annually for inflation	January 2012	\$30.7 million in 2015
Arizona	Private School Scholarship	Credit for Contributions to School Tuition Organizations (low-income)	Corporate Income Tax	Nonrefundable Credit	A corporation may claim a credit for making a donation to a School Tuition Organization for scholarships to private schools.	100 percent of contribution amount	September 2006; additions made in 2015	Capped at \$61.917 million in FY17
Arizona	Private School Scholarship	Credit for Contributions to School Tuition Organizations for Displeed Students or Students with Disabilities	Corporate Income Tax	Nonrefundable Credit	A corporation may claim a credit for making a donation to a School Tuition Organization for scholarships to private schools.	100 percent of contribution amount	August 2009; additions made in 2015	Capped at \$5 million in FY17
Florida	Private School Scholarship	Florida Tax Credit Scholarship Program	Corporate Income Tax (also other misc taxes; see description)	Nonrefundable Credit	Provides a tax credit for corporations that contribute money to nonprofit Scholarship Funding Organizations (SFOs) that award scholarships to students from families with limited financial resources. In 2009, the program was expanded to provide credits against the insurance premium tax for contributions to eligible nonprofit SFOs. In 2010, the program was expanded to provide tax credits against severance taxes on oil and gas production, self-accrued sales tax liabilities of direct pay permit holders, and alcoholic beverage taxes on beer, wine, and spirits.	100 percent of the donation. Claims cannot exceed 100 percent of corporate income tax liability (less federal corporate tax offset), 50 percent of severance liability, 90 percent of beverage tax liability.	2001	Capped at \$559.1 million in FY18
Georgia	Private School Scholarship	Georgia Qualified Education Expense Tax Credit	Personal and Corporate Income Taxes	Nonrefundable Credit	Eligible private citizens and corporations receive tax credits for donations to Student Scholarship Organizations (SSOs) who provide student scholarships to parents of eligible children who plan to attend private schools. Amount of credit can be carried forward for five years.	Corporations are limited to a credit worth 75 percent of the its total income tax liability. Individuals are limited to a credit worth up to \$1,000 for an individual, \$2,500 for a married couple, or \$10,000 for an owner for a pass-through business entity.	2008	\$45 million in FY17 (including \$33 million for individuals and \$11 million for corporations) Capped at \$50m
Illinois	Private School Tuition and/or Expenses	Education Expense Credit	Personal Income Tax	Nonrefundable Credit	Illinois taxpayers are eligible for a credit of K-12 education expenses in excess of \$250 (qualifying expenses include tuition, book and lab fees).	25 percent of qualified expenses after \$250, max credit not to exceed \$500 in a given year	1999	\$79.3 million in FY15
Indiana	Private School Scholarship	Indiana Scholarship Tax Credit Program	Personal and Corporate Income Taxes	Nonrefundable Credit	Individuals and corporations receive credit for donations to Scholarship Granting Organizations that provide vouchers for low-income students to attend private schools.	Tax credit worth 50 percent of donation, no maximum credit	2009	Capped at 9.5 million in FY17
Indiana	Private School Tuition and/or Expenses	Private/Home School Deduction	Personal Income Tax	Deduction	Any taxpayer who has a child already enrolled in private school or who is homeschooled is eligible to claim a deduction per child for approved educational expenses including private school tuition, textbooks, fees, software, tutoring, and supplies.	\$1,000 max deduction per child	2011	Unknown
Iowa	Private School Scholarship	School Tuition Organization Tax Credit	Personal and Corporate Income Taxes	Nonrefundable Credit	Iowa filers eligible for 65 percent of the amount of a voluntary cash contribution made by a taxpayer to a school tuition organization (STO)	65 percent of contribution amount	2006	Capped at \$12 million a year for 2014 and later. Cap was maxed out in most years through 2011.
Iowa	Private School Tuition and/or Expenses	Tuition and Textbook Credit	Personal Income Tax	Nonrefundable Credit	Iowa filers with one or more dependents in accredited K-12 non-profit schools can take a 25 percent credit for each dependent for amounts paid for tuition and textbooks.	Maximum credit of \$250 per dependent	2014	\$15.1m - \$15.3m each year from 2005-2011
Kansas	Private School Scholarship	Kansas Low Income Students Scholarship Program	Corporate Income Tax, Privilege Tax, Insurance Premium Tax	Nonrefundable Credit	Corporations receive credit for donations to Scholarship Granting Organizations that provide vouchers for low-income students to attend private schools. Unused credit can be carried forward indefinitely.	The credit is equal to 70 percent of the contribution. If the amount of credit exceeds the contributor's tax liability in any one taxable year, the remaining portion of the credit may be carried forward until the total amount of the credit is used.	2013	Capped at \$10 million per year
Louisiana	Private School Tuition and/or Expenses	Elementary and Secondary School Tuition Deduction	Personal Income Tax	Deduction	Louisiana filers can deduct the actual qualifying costs paid per dependents enrolled in non-public schools. (50 percent of qualifying costs paid per dependents who are home-schooled or attend a public school.)	Deduction limited to \$5,000 per dependent	2009	\$22.606 million in FY17
Louisiana	Private School Scholarship	Tuition Donation Rebate Program	Personal and Corporate Income Taxes	Refundable Credit	Individuals receive rebate for donations to School Tuition Organizations (STOs) that offer scholarships to eligible students in families with incomes below 250 percent of the federal poverty line. Louisiana DOR provides donor with a full rebate of the portion of the contribution used to fund scholarships regardless of state income tax liability.	Rebate generally set at 95 percent of contribution (100 percent rebate on the portion of the contribution used for scholarships, but no rebate for the portion, up to 5 percent, devoted to administrative costs)	2012	\$100,000 in FY17

State	Category	Name	Tax	Type	Description	Tax Break Amount	Enacted	Cost
Minnesota	Private School Tuition and/or Expenses	K-12 Credit	Personal Income Tax	Refundable Credit	Taxpayers eligible for credit equal to 75 percent of qualifying K-12 expenses, subject to household income restrictions. To qualify for credit, you must meet household income thresholds. Qualifying expenses include transportation, textbook, instructional materials, tutoring, academic summer school and camps, and up to \$200 of the cost of a computer or education-related software. Nonpublic school tuition is not a qualifying expense for the credit.	Credit limited to 75 percent of qualifying K-12 expenses.	1997	\$12.9 million in 2015
Minnesota	Private School Tuition and/or Expenses	K-12 Education Subtraction	Personal Income Tax	Deduction	Taxpayers eligible for the deduction can claim qualifying expenses including tuition paid for private schools and/or college courses used to satisfy high school graduation requirements. Qualifying child must attend a school located in MN, IA, ND, SD, or WI. The deduction can be claimed by qualifying taxpayers regardless of whether they claim itemized or the standard deduction at the federal level.	Limited to \$1,625 for each qualifying child in grades K-6 and \$2,500 for grades 7-12.	1955 (1998 most recent values)	\$20 million in FY 2017
Montana	Private School Scholarship	Tax Credit Scholarship Program	Personal and Corporate Income Taxes	Nonrefundable Credit	Montana taxpayers receive credit for donations to school scholarship organizations (SSOs) that give private school K-12 scholarships to Montana students.	Credit capped at \$150 per filer	2015	Capped at \$3 million in 2015
Nevada	Private School Scholarship	Educational Choice Scholarship Program	Modified Business Tax	Nonrefundable Credit	Corporations receive credit for donations to Scholarship Granting Organizations that provide vouchers for low-income students to attend private schools. (Eligible household income is 300 of federal poverty line).	100 percent of contribution	2015	Capped at \$5 million w/ escalator
New Hampshire	Private School Scholarship	New Hampshire Education Tax Credit	Business Profits Tax (BPT) / Business Enterprise Tax (BET)	Nonrefundable Credit	Businesses can receive a tax credit for donations to organizations that fund private school scholarships	Credit limited to 85 percent of contribution	2012	Capped at \$3.4 million the first program year and \$5.1 million the second program year with subsequent increases; if aggregate credits hit 80% of cap then the cap increases by 25%.
Oklahoma	Private School Scholarship	Oklahoma Equal Opportunity Education Scholarship	Personal and Corporate Income Taxes	Nonrefundable Credit	Individuals and corporations can claim a tax credit for contributions made to a "scholarship-granting organization". Amount of credit can be carried forward for three years.	Credit is equal to 50 percent of the contribution made with a maximum credit of \$1,000/\$2,000 for single/married individuals and \$100,000 for business entities. If taxpayer pledges to donate for 2 consecutive years the credit is increased to 75 percent of the donation (with the same caps).	2011	\$672,000 in FY 2016. (capped at \$3.4 million annually with an even split between individuals and businesses)
Pennsylvania	Private School Scholarship	Pennsylvania Opportunity Scholarship Tax Credit	Personal Income Tax (businesses only) / Corporate Income Tax (also other misc taxes; see description)	Nonrefundable Tax Credit	Businesses can claim a tax credit for contributions made to "opportunity scholarship organizations" (OSOs) that provide scholarships to students who meet zoning and income requirements. Credits are available to businesses who are subject to one or more of the following taxes: Personal Income Tax, Capital Stock / Foreign Franchise Tax, Corporate Net Income Tax, Bank Shares Tax, Title Insurance & Trust Company Shares Tax, Insurance Premium Tax, Mutual Thrift Tax, Malt Beverage Tax, Retailatory Fees under section 212 of the Insurance Company Law of 1921.	Tax credits equal to 75 percent of its contribution up to a maximum of \$750,000 per taxable year, 90 percent of the contribution if a business agrees to provide same amount for two consecutive tax years.	2012	Capped at \$50 million in 2015-16
Pennsylvania	Private School Scholarship	Educational Improvement Tax Credit Program	Personal Income Tax (businesses only) / Corporate Income Tax (also other misc taxes; see description)	Nonrefundable Tax Credit	Businesses can claim a tax credit for contributions to scholarship organizations, organizations that support innovative programs in public schools, or pre-kindergarten scholarship organizations. Credits are available to businesses who are subject to one or more of the following taxes: Personal Income Tax, Capital Stock / Foreign Franchise Tax, Corporate Net Income Tax, Bank Shares Tax, Title Insurance & Trust Company Shares Tax, Insurance Premium Tax, Mutual Thrift Tax, Malt Beverage Tax, Retailatory Fees under section 212 of the Insurance Company Law of 1921.	Tax credits equal to 75 percent of its contribution up to a maximum of \$750,000 per taxable year. Credit increases to 90 percent of the contribution if a business agrees to provide same amount for two consecutive tax years. For contributions to Pre-Kindergarten Scholarship Organizations, a business may receive a tax credit equal to 100 percent of the first \$10,000 contributed and up to 90 percent of the remaining amount contributed up to a maximum credit of \$200,000 annually.	2001	Capped at \$125 million
Rhode Island	Private School Scholarship	Credit for Contributions to Scholarship Organizations	Personal Income Tax (businesses only) / Corporate Income Tax	Nonrefundable Credit	Rhode Island provides a credit for donations to Scholarship Granting Organizations (SGOs), nonprofits that provide private school scholarships.	Tax credits are worth 75 percent of the contribution, or 90 percent if donated for two consecutive years and the second year's donation is worth at least 80 percent of the first year's donation. Each donor can receive only \$100,000 in tax credits each year, and cannot use surplus donations in one year to generate tax credits in future years.	2006	The total amount of tax credits is capped at \$1.5 million
South Carolina	Private School Scholarship	Educational Credit for Exceptional Needs Children	Personal and Corporate Income Taxes	Nonrefundable Credit	Individuals and businesses are awarded a tax credit for contributions to nonprofit scholarship funding organizations	Taxpayers can claim a credit up to 60 percent of their total tax liability for a given year	2013	Capped at \$10 million
South Carolina	Private School Tuition and/or Expenses	Refundable Educational Credit for Exceptional Needs Children	Personal Income Tax	Refundable Credit	Parents/guardians receive tax credit for cost of private school tuition for special needs children	Taxpayers can claim a credit of up to \$11,000 per child	2015	Capped at \$2 million
South Dakota	Private School Scholarship	Partners in Education Tax Credit Program	Insurance Company Premium and Annuity Tax	Nonrefundable Credit	Insurance companies can receive a tax credit for donations to Scholarship Granting Organizations (SGOs) who grant private school scholarships to qualifying students and families (150 percent of federal poverty line or lower).	Credit is equal to 80 percent of the donation	2016	Capped at \$2 million
Virginia	Private School Scholarship	Education Improvement Scholarships Tax Credit	Personal and Corporate Income Taxes (also other misc taxes; see description)	Nonrefundable Credit	Provides state tax credits for persons or businesses making monetary or marketable securities donations to approved scholarship foundations that provide scholarships to eligible students for qualified educational expenses incurred in attending eligible nonpublic schools. Credit can be carried forward for up to five years. The tax credit can be claimed against the personal income tax, corporate income tax, bank franchise tax, insurance premiums license tax, or tax on public service corporations.	The tax credit is equal to 65 percent of donations. Individuals' donations must be at least \$500 to qualify, and the credit cannot exceed \$81,250 (representing 65 percent of a \$125,000 donation). No limits on maximum or minimum donations for business donations, including sole proprietorships.	2014	Unknown, but capped at \$25 million per fiscal year
Wisconsin	Private School Tuition and/or Expenses	Tuition Deduction	Personal Income Tax	Deduction	Parents are allowed to deduct private and religious school tuition	Up to \$4,000 for children in grades K-8 and \$10,000 for children in grades 9-12	2014	\$30 million annually
