In Florida 56.3 Percent of Trump's Proposed Tax Cuts Go to People Making More than \$1 Million

A tiny fraction of the Florida population (0.7 percent) earns more than \$1 million annually. But this elite group would receive 56.3 percent of the tax cuts that go to Florida residents under the tax proposals from the Trump administration. A much larger group, 53.1 percent of the state, earns less than \$45,000, but would receive just 3.8 percent of the tax cuts.

The first group, the millionaires, would receive an average tax cut of \$258,270 in 2018, equal to 7.7 percent of their income. The second group, those making less than \$45,000, would receive an average tax cut of just \$230, equal to 1.0 percent of their income.

The figures in this brief have been calculated by the Institute on Taxation and Economic Policy (ITEP) based on broad principles for tax policy released by the Trump administration on April 26 as well as subsequent statements by administration officials. Because the principles and statements left many unanswered questions, the estimates required some assumptions. [ITEP's longer report](#) explains these assumptions and each tax proposal in detail. That report concludes that the Trump tax principles would reduce revenue by at least \$4.8 trillion over 10 years.
